

Pierre's Scotson Therapy in pictures

- Here is Pierre's Scotson Therapy in pictures for a picture tend to say more than 1000 words.
- Other than the Scotson Therapy which he is on since February 2006 he is ongoing getting Occupational Therapy and Physiotherapy and taking Glyco Nutrition since July2007.
- Here is the proof of what a dedicated, hard working team of therapist with God's grace can achieve.

Sitting

- February 2006
Spastic full support sitting, with little head control
- November 2008
Sitting on his own, with normal head control

Back

- February 2006
Look at the bad scoliosis
to the right.
- November 2008
His back almost straight.

Ribcage

- February 2006
Pierre's diaphragm was so underdeveloped that it pulled his ribcage down to almost touch his hips, compressing his organs.
- November 2008
His diaphragm has developed to such an extent that his ribcage is no longer compressing his organs.

Best milestone

- February 2006
On all fours with a lot of help and frustration on his side.
- November 2008
Standing against a wall for more than one minute on his own.
